

BOOST X

A 'SUPERBOOST' FOR RST SOLUTIONS' ROAD DUST SUPPRESSANT RANGE

- A 'SuperBoost' for RST Solutions' road watering products
- Used as a pre-treatment for the RST Solutions' Haul Road Management System
- Builds up required product residuals in the road surface - fast
- Effective in treating hard to control dusty 'Hot Spots'
- Improves the product mixing process
- Fast and instant results

DESCRIPTION

BOOST X is used as a 'Super Boost' for RST Solutions' road watering products. Used as a pre-treatment for the RST Solutions' Road Dust Suppressant range, the addition of Boost X will improve the mixing process of the RST Solutions' product solution and increase the initial reaction time of these by adding a concentrated dose of blended surfactants into the road surface material.

- Accelerates the products roads compaction process
- Allows the water sprayed on the road surface to penetrate easily
- Breaks the surface tension created between the water sprayed on the road surface and road material
- 100% environmentally safe

APPLICATION

BOOST X is mixed with water and sprayed over the haul road surface prior to applying RST Solutions' Road Dust Suppressant products.
